PROFESSIONAL SUMMARY

Results-driven Full-Stack Software Engineer with 2+ years of experience architecting and delivering enterprise ERP, CRM, and internal business applications from requirement gathering to production. Proficient in Angular, Node.js, Express.js, PHP, MySQL, and RESTful APIs. Strong analytical background in Power BI and SQL, having reduced manual reporting effort by ~70% through automated data pipelines. Seeking a Full-Stack or Software Engineer role in a product-driven company where I can build scalable systems and deliver measurable business impact.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, PHP, C#

Frontend: Angular, HTML5, CSS3, Bootstrap

Backend: Node.js, Express.js, PHP, Django, ASP.NET Core (Basic)

Databases: MySQL, SQL, phpMyAdmin

APIs & Tools: RESTful APIs, Postman, Git, GitHub

Data & BI: Power BI, Data Analysis, Data Visualization, Excel

Cloud & ML: AWS (Basic), Scikit-learn, Machine Learning

Methodologies: Agile, End-to-End Delivery, Production Support, Debugging

PROFESSIONAL EXPERIENCE

Software Engineer | *Sedna Technologies — Kalyan, Maharashtra*

July 2026 – Present

- Spearheaded an Order Management ERP end-to-end — requirements, development, deployment, and post-launch production support — processing 1,500+ orders using Angular, Node.js, Express.js, and REST APIs.
- Built a real-time Inventory Management ERP with automated low-stock alerts, product movement history, and dashboard reporting, managing 500+ SKUs with zero data inconsistency.
- Launched a Billing ERP using PHP, HTML, CSS, and MySQL covering invoice generation, payment tracking, and financial reporting — handling 100+ active billing records monthly.
- Engineered an Employee Management System for 20+ staff, including work-entry tracking, project-wise activity logs, and exportable operational reports, reducing HR coordination time by 30%.
- Maintained and upgraded a CRM Management System by resolving critical bugs, shipping feature updates, and providing direct user issue resolution — improving platform uptime and client satisfaction.
- Designed, documented, and maintained RESTful APIs (GET, POST, PUT, DELETE) with Postman collections, enabling clean frontend-to-MySQL integration across 4 enterprise applications.

Data Analyst | *ACS Consultancy — Remote (Part-time)*

April 2024 – April 2025

- Built automated Power BI KPI dashboards tracking Revenue, Growth Rate, Profit Margin, and Top Products — providing executives with real-time multi-dimensional drill-through analysis by region, time, and sales rep.
- Automated data refresh pipelines using SQL and Power Query, cutting manual reporting effort by ~70% and eliminating weekly report generation from 8 hours to under 2 hours.
- Cleaned and normalized 50,000+ monthly sales records using SQL and Excel, resolving data inconsistencies and improving reporting accuracy to 98%+.
- Presented data storytelling insights to senior leadership, identifying 3 underperforming sales zones that led to targeted campaign adjustments and a 12% regional revenue improvement.

Data Science Intern | *AiVariant — Remote*

January 2024 – March 2024

- Built a Book Recommendation System using Python and Scikit-learn, applying collaborative filtering, content-based filtering, and EDA to a dataset of 270,000+ books.
- Executed an end-to-end ML pipeline: data preprocessing, feature engineering, model training, evaluation, and accuracy benchmarking — achieving 87% recommendation relevance score.
- Documented findings and model performance metrics, presenting results to the senior data science team for review and feedback.

Data Analyst Intern (Remote) | Saanzz Digital — Remote

April 2023 – July 2023

- Produced 5+ interactive Power BI dashboards and MySQL-driven reports to support weekly business performance reviews and client reporting cycles.
- Supported data cleaning, transformation, and ad-hoc analysis using Excel and SQL, reducing report preparation time by 40%.

PROJECTS

Happiness Index System for Students — Python · Django · HTML · CSS · RESTful APIs

Aug 2022 – July 2023

- Architected a full-stack Django web app to calculate and track student happiness indexes across 4 key dimensions: health, education, psychological well-being, and governance.
- Created a custom scoring algorithm analyzing 12+ input factors; delivered personalized actionable suggestions per student, improving engagement tracking for 200+ students.
- Built RESTful APIs for data submission and retrieval; deployed with a clean, mobile-responsive HTML/CSS frontend.

LPG Gas Leakage Detection System — Python · Arduino · IoT · MQ6 Sensor · Solenoid Valve

March 2022 – July 2022

- Prototyped an IoT safety device using Arduino UNO and MQ6 gas sensor that triggers automatic Solenoid Valve shutoff and buzzer alert within 2 seconds of gas detection.
- Coded real-time sensor logic in Python/C++ and integrated hardware components (SMPS, LED, Buzzer); device validated for household and LPG pump deployment.

EDUCATION

B.Tech in Computer Science & Engineering | Walchand Institute of Technology, Solapur

July 2023

CGPA: 8.26 / 10.0 | Relevant: Data Structures, DBMS, Operating Systems, Web Technologies, Machine Learning

HSC (12th Grade) | SMT. J.H.Deshmukh Jr. College, Jarud

March 2019

Percentage: 60.92% | Science Stream

SSC (10th Grade) | Vasantrao Naik High School, Jarud

March 2017

Percentage: 81.60%

CERTIFICATIONS & ACHIEVEMENTS

- Data Science Certification – ExcelR (2024)
- Data Science Internship Certificate – AiVariant (2024)
- Participant, Regional Level Project Competition – AISSMS College of Engineering (2023)
